PULMOLL Throat Drops

Pulmoll has always offered an extensive range of products, which guarantee a soothing, releasing and tasty enjoyment. The functional benefits derive from selected ingredients such as menthol, fruit juice concentrates and Vitamin C. The calorie-reduced and tooth-friendly sugarfree variants are based on Maltitol as state-of-the-art sugar replacer and Stevia as additional natural sweetener. Pulmoll offers a premium positioning in the growing sugarfree market and is most suitable for high-grade sales channels such as pharmacies and drugstores.

PULMOLL Throat Lozenges: Mini Tin assortment

Pulmoll not only offers a standard assortment of medium sized 45g tins but also serves the market with handy 20g mini tins containing up to 20 lozenges. All flavours (three of them enriched with Vit. C) are sugarfree based on Isomalt and additionally sweetened with Stevia. Pulmoll Mini tins are fit for multi-channel distribution in drugstores, pharmacies and impulse retail. Due to their manageable size the recyclable tins are most suitable for check-out placement and counter placement. Small. Functional. Tasty.
